

QUALITY MOULDS

for the
**Automotive
Industry**

Cost & Speed Advantage

Traditionally, the automotive industry has always placed demands on mold makers to have high precision, high volume production molds, long tool life-span, short molding cycle-time, automated production, and more. All this usually translates to a high cost and a long lead-time. Today, Express Tech can help you avoid these two pit-falls by shortening your lead-time and attaining a lower cost outlay. With our progressive work-flow, quick turnaround for engineering changes and proven systems, we are able to assist you in achieving more for less.

Strategic Advantage

Express Tech Manufacturing is a wholly owned Singapore company founded in 1998, specialising in engineering and manufacturing of plastic injection and aluminium die cast moulds for the automotive, IT, mass storage and telecommunications industries. Express Tech operates manufacturing in three countries - Singapore, China and Thailand. Majority of the 300 moulds built per year were exported to the United States and Europe. Its end customers include some of the most prominent companies in the world, such as General Motors, Kawasaki, Kostal, Marquardt, Toyota, Valeo and Volkswagen.

Award- Winning Advantage

The Singapore Advantage

Express Tech is an ISO 9001 certified company since 2003. Its continual emphasis on quality is further illustrated by its award-winning feats where it has been presented the Enterprise 50 and Fastest Growing Enterprise 50 awards in Singapore as well as the SME 500 awards.

With experienced staff and stringent management systems in place, customers can expect superior quality end-results every time. This attribute coupled with low operating costs allows Express Tech to offer to its customers unprecedented value for its services and products.

Contact Express Tech if you need moulds for:
